

CS Ultra™

The Cost-Effective 100 % Replacement of Calcium Stearate

Physical Form	Powder
Appearance	Off - White
Compatibility	PVC

INTRODUCTION	CS Ultra is an additive that is a 100% superior alternative to Calcium Stearate, engineered to work as a lubricant and processing aid in the production of PVC pipes. It is a specially designed and formulated additive that improves dispersion and reduces friction.	
SPECIFICATIONS	➤ 100% Calcium Stearate Replacement – A cost effective alternative without compromising performance. ➤ Better Dispersion – Delivers greater uniformity and consistent product performance. ➤ Superior Lubrication – Provides excellent internal and external lubrication for improved shine and surface finish. ➤ Smoother Processing – Reduces friction between filler and resin during extrusion. ➤ Lower Production Waste – Promotes consistent quality and minimizes defects. ➤ Better Marking & Labeling – Smoother pipe surfaces enable clearer, sharper markings.	
RECOMMENDED DOSAGE	Same as your regular Calcium Stearate (CS), may vary depending on the actual formulation.	
APPLICATIONS	➤ Rigid PVC & uPVC Pipes ➤ Conduit Pipes ➤ PVC Edge Band ➤ PVC Windows, Doors & Profiles ➤ PVC Flooring ➤ PVC Cable Compounds ➤ PVC Casing & Capping
